

Science Observation Notebook

Assembly Directions:

Copy one Science Notebook for each child. Make as many copies of the inside pages as you want or need; no cutting is required. To assemble the books, fold each inside page with the fold on the right. Fold the cover with the fold on the left and place the pages inside, then staple books together on the left. Keep the Science Notebooks in your [science center](#) and children can record their observations of experiments or living things like plants and class pets when they visit. The blank space at the top of each inside page titled "Scientist" is for students to practice writing their names. Students will record their observations by drawing in the box provided.

My Science
Observation
Notebook

by

Scientist:

Observation:

A large rectangular area defined by a dashed border, intended for writing an observation.
